The AI-Powered Data Security Platform

Velotix allows you to discover, visualize, and use your data while remaining secure and compliant. Our AI-powered Data Security Platform enforces the right policies so you can grant data access in a prompt and secure way.

TRUSTED BY FINANCIAL ENTERPRISES WORLDWIDE:

OCBC   liquid group   FIBI   Sterling   LONDON STOCK EXCHANGE An LSEG Business   AIG   Deutsche Bank   BARCLAYS

SIMPLIFY DATA SECURITY. STREAMLINE DATA ACCESS.

Take control of your data security and compliance by centralizing policy and permission control, automating policy enforcement, and streamlining secure data access to drive business innovation and scale.

Common Velotix Use Cases:

- **Discover, Visualize & Search Your Data**
  Classify and auto-tag all data so it's completely searchable in a visible dashboard across your data landscape.

- **Manage Joiner/Mover/Leaver Permissions**
  Update data access when employees join, move, or leave positions with highly sophisticated AI-based permissions.

- **Secure AI/ML Applications**
  Train AI/ML algorithms with protected data.

- **Solve Compliance Drift**
  Centralize, create and maintain data protection policies to automatically detect and remediate conflicts between permissions and policy.

- **Eliminate Dark Data**
  Gain visibility into your data by centralizing, categorizing,and tracking data activity.

- **Data Democratization**
  Enable self-service data access for everyone in the organization.

UNIFY & PROTECT YOUR DATA
